

LIFTING & TESTING ACCESSORIES

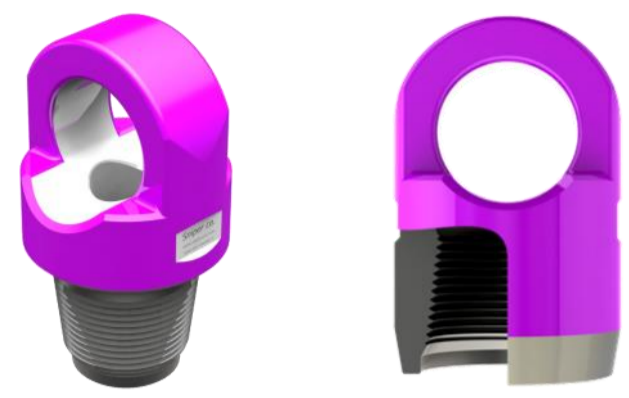

INTRODUCTION

We offer you a wide range of Lifting Plugs and Cups, Lifting & Handling Nubbins, High pressure testing Plugs and Cups, and many others useful accessories for oilfield lifting and testing operations.

LIFTING PLUG / CUP TYPE SC-R

TYPE SC plugs and cups are used for lifting and handling of drill collars, stabilizers, drill pipes, drill bits, heavy crossover and accessory, etc ... and protect threads from any damage.

Lifting Plugs and Cups TYPE SC-R are screwable by hand tight only.

• Lifting Plug Type SC-R • Lifting Cup Type SC-R

LIFTING & TESTING PLUG / CUP TYPE SC-T

Lifting Plugs and Cups TYPE SC-T with NPT outlet for test or gauge connection, used for lifting and handling of drill same to TYPE SC ... Also maybe used as pressure testing device, with adequate design to maintain testing pressures, with a sufficient tong space for proper bucking operations.

Plug and Cup TYPE SC-T are screwed by hand tight only for handling and lifting. Power torque is required when screwed for pressure operations.

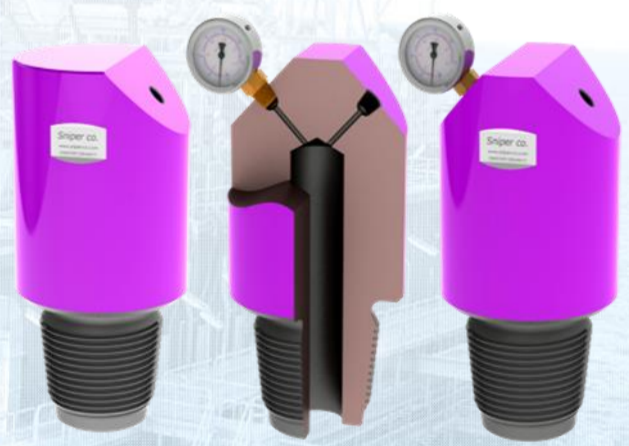

• Plug Type SC-T • Cup Type SC-T

Other Plug and Cup :

• **TYPE SC-P** Lifting & testing Plug and Cup with Lifting Padeye up to 13.5 metric tons capacity

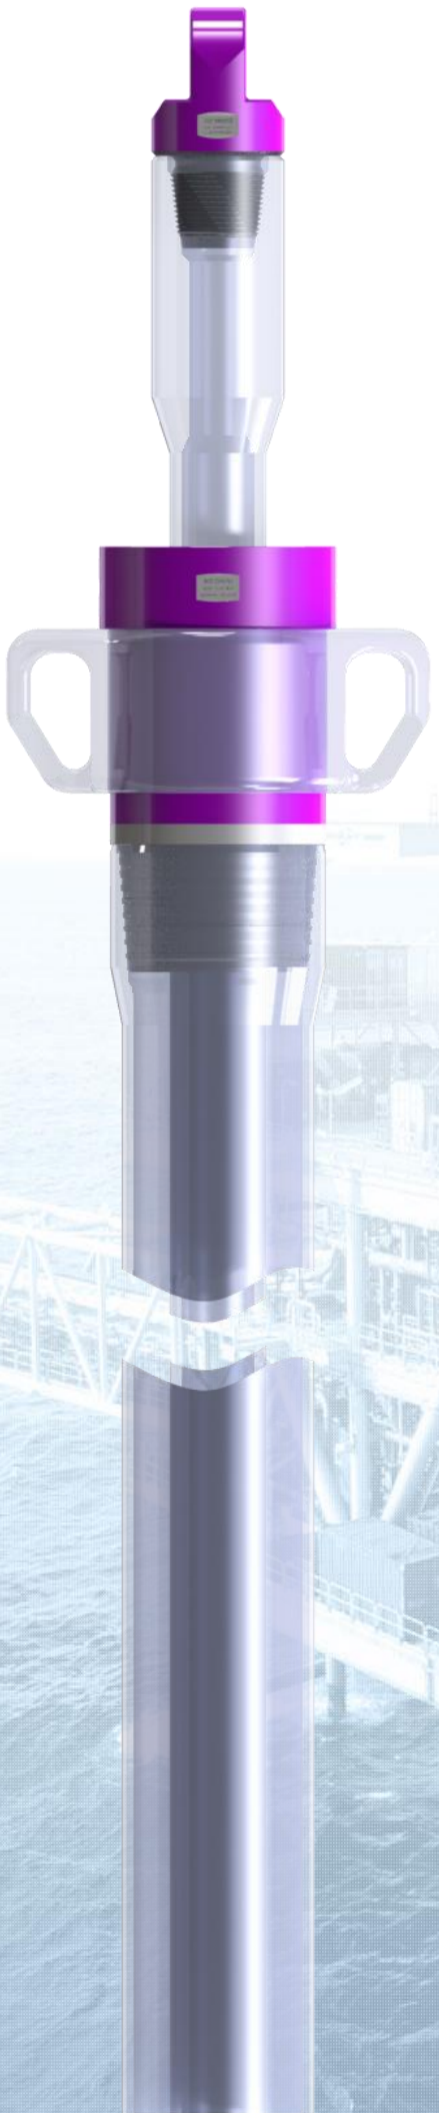

• **TYPE SC-V & TYPE SC-W** testing Plug and Cup with with one or two NPT outlet for pressure test and pressure dial gauge

• **TYPE SC-H** Heavy Duty Lifting Plug with Lifting Padeyes up to 35 metric tons capacity

Note: All types of Testing and lifting Plugs and cups are available with carbon steel and chromium steel materials

LIFTING & TESTING ACCESSORIES

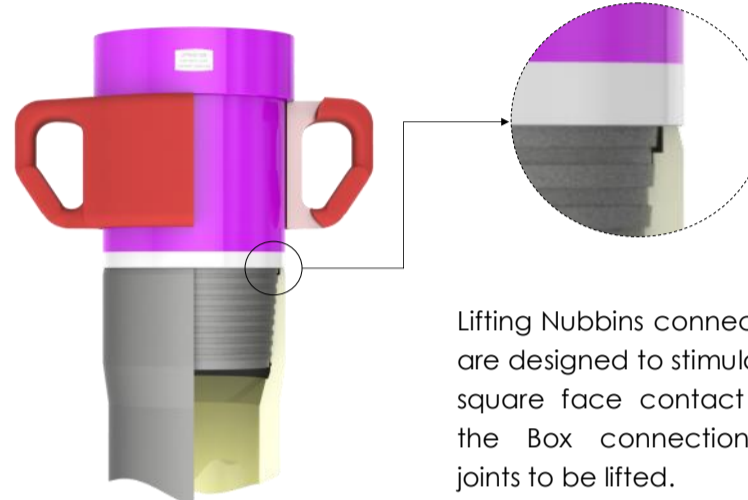

OCTG LIFTING NUBBINS TYPE TC

We provide Lifting & Handling Nubbins **TYPE TC**, Used for lifting and handling of different types and sizes of tubing and casing (OCTG), also useful for the protection of box connection from any damage maybe caused during handling.

- Lifting sub **TYPE TC-S** (with short thread)
- Lifting sub **TYPE TC-L** (with long thread & Cr material)

Lifting Subs **TYPE TC-LS** are used for flush connections with critical and weak section thickness. With Lifting subs TYPE TC-LS there is no contact between elevator and connection OD to avoid any probable damage during handling and lifting operations.

- Lifting sub **TYPE TC-LS** (with long thread and elevator space)

Lifting Nubbins connections are designed to stimulate a square face contact with the Box connections of joints to be lifted.

OCTG TESTING PLUGS / CUPS TYPE TC-T

We provide blind Testing Plugs and Cups TYPE TC-T with NPT outlet for OCTG pipes and accessories pressure tests operations.

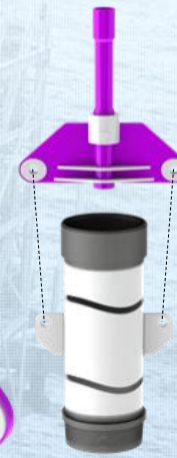

- Testing Cup **TYPE TC-T** for Casing with carbon steel material

- Testing Plug **TYPE TC-T** for Tubing with Chromium steel material

CONDUCTOR LIFTING & RUNNING TOOL

We provides Conductor Lifting and Running Tool TYPE CR-PE and Conductor Lifting Sub TYPE CR-LS, Used for lifting and running of different types of conductor casings from 20 to 36 inches nominal diameters.

- Conductor Lifting Sub **TYPE CR-LS**

- **TYPE CR-PE** Conductor Lifting & Running Tool
